## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

Claims 9-12 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicant's claims are narrative in nature with the preambles setting forth apparent apparatus claims and the body method step. Applicant should amend his claims to include structure for performing the functions that are stated. Claim 15 depends from a canceled claim, claim 1.

### ***Claim Rejections - 35 USC § 101***

Claim 12 is rejected under 35 U.S.C. 101 because the disclosed invention is inoperative and therefore lacks utility. Claim 12 recites that the apparatus/method varies the area of the object, which is impossible. It is believed that the applicant meant that the perceived area in varied.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 9 is rejected under 35 U.S.C. 102(b) as being anticipated by Munyan USPN 5761485. Applicant appears to be merely claiming a display in

Art Unit: 3762

which two different images can be viewed simultaneously, e.g. a split screen monitor, which is notoriously old and well known as evidenced by Muyan.

Claim 12 is rejected under 35 U.S.C. 102(b) as being anticipated by Hama et al USPN 4,751,507. Applicant appears to merely be claiming a device for performing a zoom effect of an image to be impinged upon the eye nerves. Hama et al shows a split screen device for varying the amplification of different regions of an image.
